

Hands-On Science & Math Summer Camp for Girls (grades 6-10)

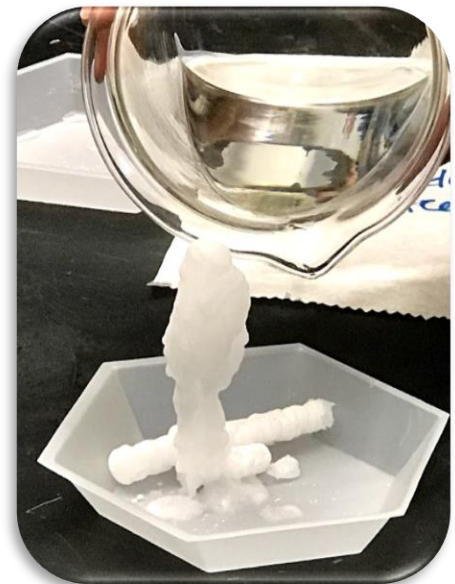

Oakwood Friends School
Science
And
Math Camp for Girls

**July 29-Aug 2
2019
9am to 3pm**

SAM camp is a week-long science & math summer camp that inspires girls with thought-provoking and hands-on projects. Now in our 9th year, our goal is to make STEAM topics fun and inviting and to instill confidence as campers tackle challenging activities. Our campers have soldered circuits, decoded math cyphers, drilled holes to seed mushroom logs and sculpted ceramic art. We rely on local (mostly women) instructors to share their passion about STEAM subjects. Join us for the fun!

**Learn from scientists, engineers
and mathematicians about
exciting STEAM topics & how
they lead to rewarding careers.**
